01 Background

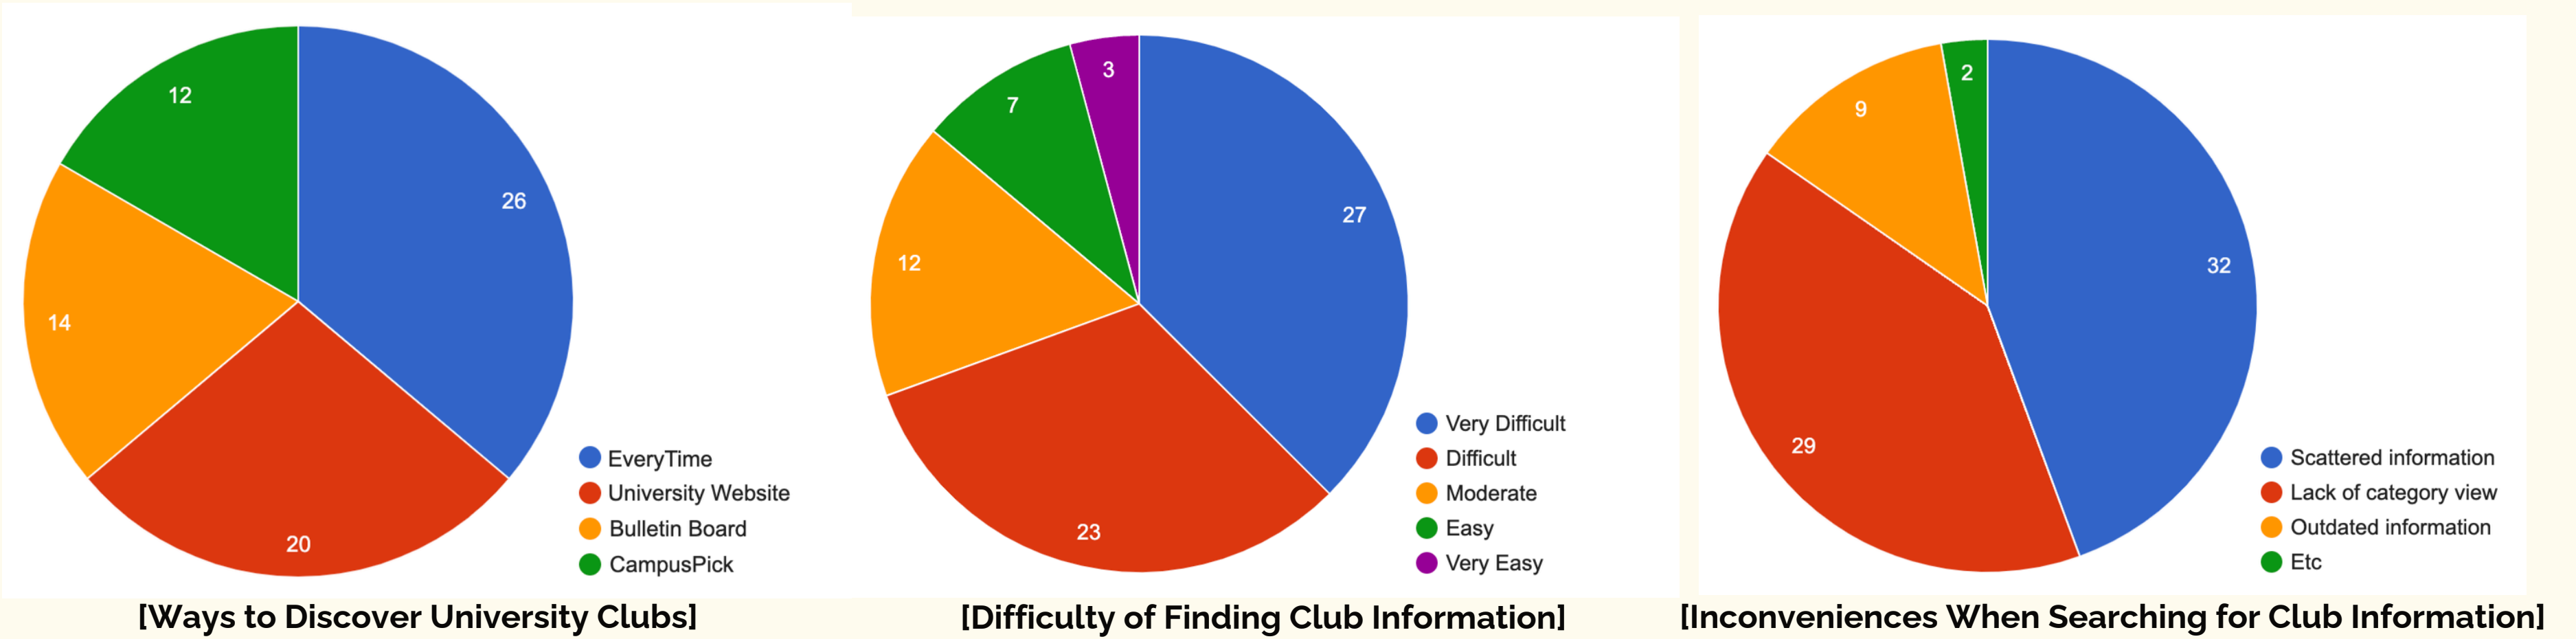

These days, many universities host a wide variety of clubs, which have become an essential part of campus life for students.

However... how do we search for these club informations?

01 Background

Student survey : Searching Club Informations

➡ Students are having difficulties in searching club informations!

01 Background

Currently, students obtain information about the club through the following platforms.

[Everytime]

[School Webpage]

[CampusPick]

However, they all come with their own **FATAL SHORTCOMINGS!**

02 Problem

- Absence of a category classification feature
- ➔ Hard to find desired category
- The format of the content varies for each post
- ➔ Important information is sometimes missing.

[Everytime]

[Unrelated categories mixed together]

[Missing information]

02 Problem

- Club information is divided by college and posted on seperate webpage
- ➡Inconvenience of having to search through multiple websites.

[School Webpage]

- Outdated and inaccurate information.
- ➡Low reliability

[Only about Central clubs]

[Wrong information]

[Invalid Link]

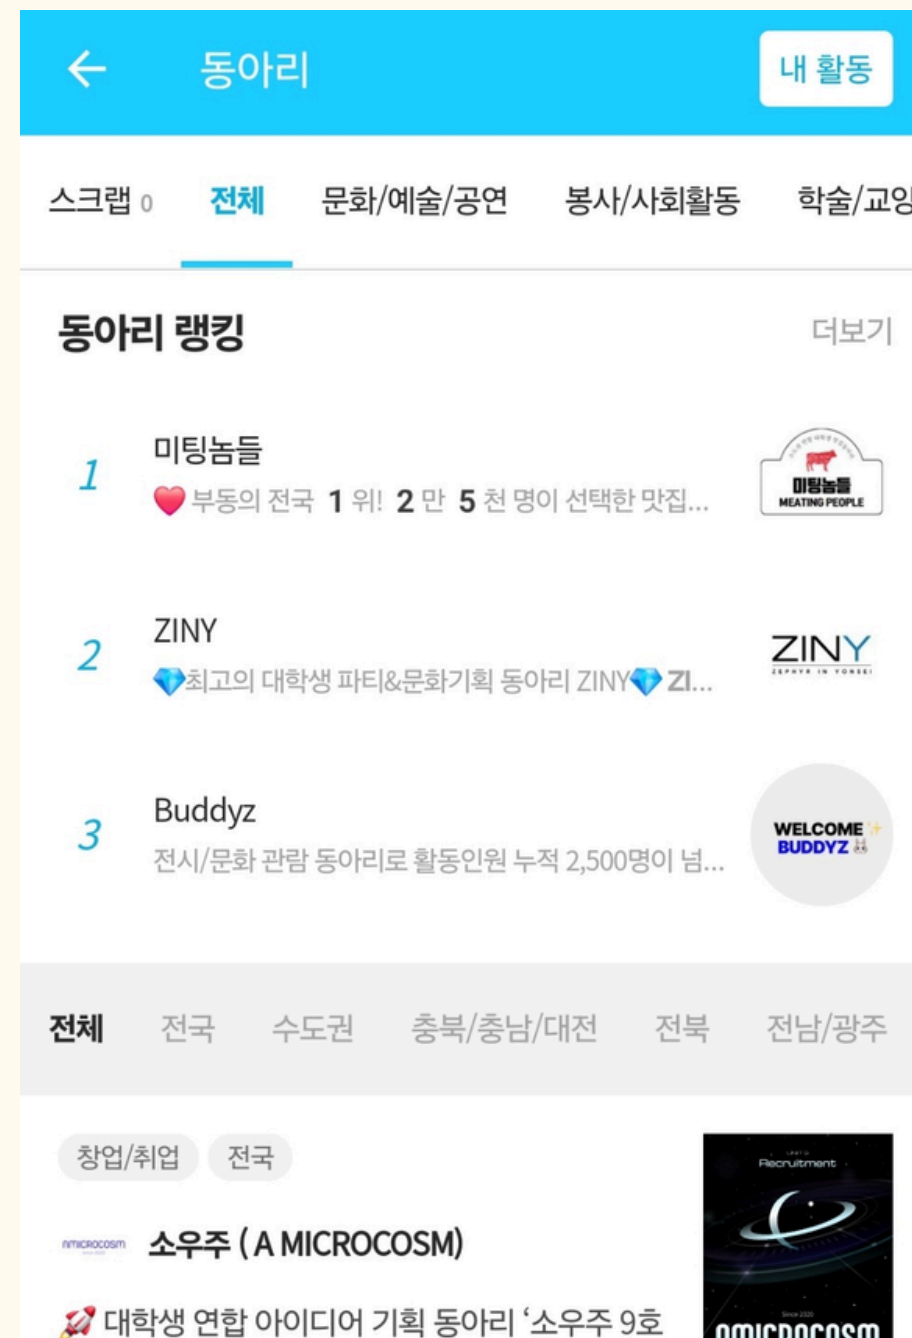

02 Problem

[CampusPick]

- Not categorized by university
- ➡ Cannot selectively view information about clubs from a specific university.

[No university category]

03 Solution & Expectation

CircleSpace

[Classification and categorization of club information]

Students can easily explore clubs that match their interests

[Club information in standardized format]

This will prevent the omission of important informations

[Real-time updates of club information]

This will improve accuracy and reliability of information

[Login system using university account]

This will ensure credibility of club information

[Notification system for favorite clubs]

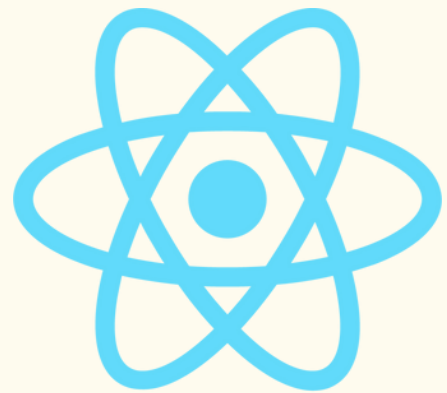

This will improve communication between clubs and students

[Review and rating system]

Students can get help on choosing clubs
Club managers will able to use feedback to improve their club.
