

NLP-based Psychological Diagnostic Diary

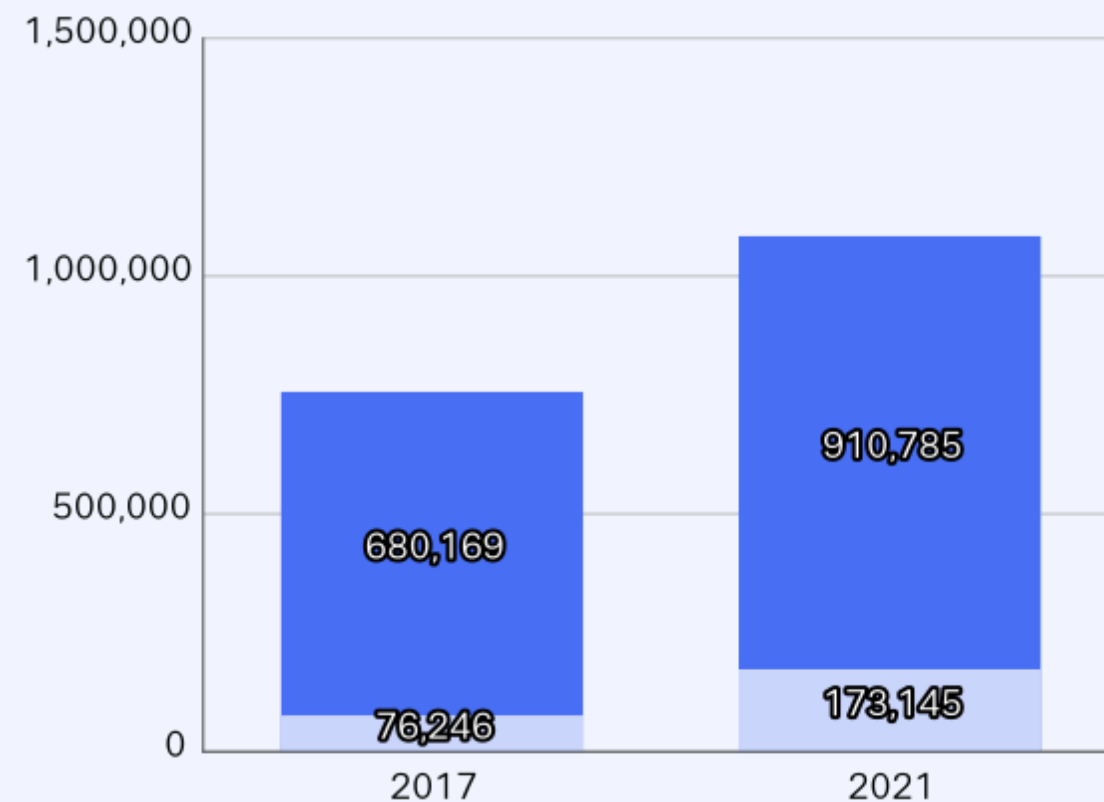

Ideation

런닝머신 팀(Team C) 김나영 김예담 박준현 방기호

01. Problem Statement

Increase in Depressive Patients

In particular, the increase in youth depression patients in their 20s and 30s is the largest, so attention is needed.

Emergence of Masked Depression

Masked Depression:

A special form of depression that the patient himself does not have a self-aware pathological perception of depression because depression is hidden inside without being exposed

02. Proposed Solution

NLP-based Psychological Diagnostic Diary

User-Friendly
Diary

Providing
Medical Information
Based on Diagnosis

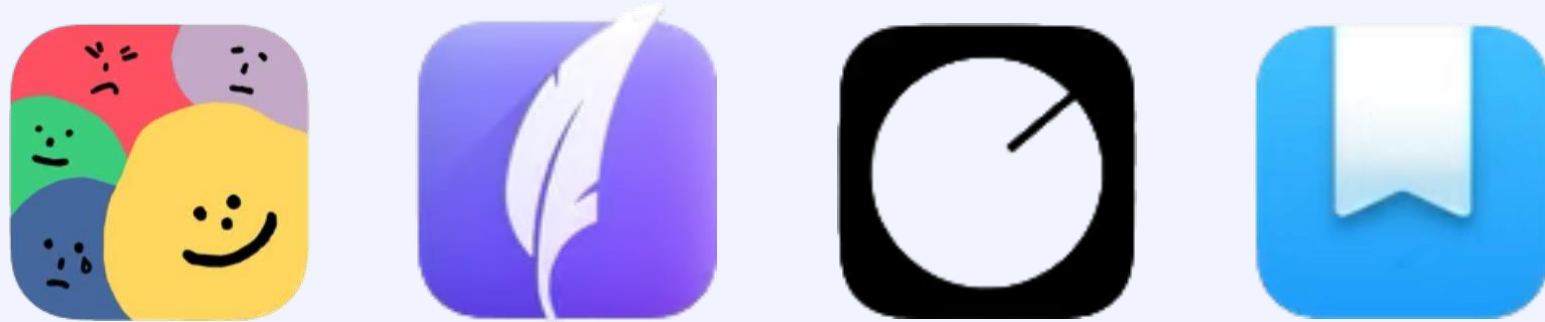

Connect to
**Professional Counseling
Service**
